

# HODL

## What makes HODL unique?

HODL is the first ever community owned, developer and team wallet-free token on the BSC space. The token has a strong and vibrant community on Telegram, and the team of volunteers are working tirelessly every day to expand the project. The developer's previous project on the Ethereum Network grew to into a large success, Furthermore, HODL has locked liquidity for 6 months so there is no chance of a rugpull. Join us and be a part of the revolution!

## Why BSC (Binance Smart Chain) is revolutionary

By now, we are all well aware that the Ethereum network has been charging ludicrous gas fees due to its overheating. Too many transactions on the network has caused the network fail on its trusted investors, due to being too inefficient. This is where the Binance Smart Chain comes in to take over. Transaction fees are around ~\$2 compared to Ethereum's ~\$100. All transactions are executed smoothly, and efficient trading is possible for all investors on this revolutionary network.

## Why we haven't implementing a farming system yet

While the idea of large APY from token and LP locking and farming are tempting to buyers, we believe the HODL protocol offers a more hands off approach. The problem with farming ranges from impermanent loss, additional LP swaps and another layer of tracking overall. The redistribution mechanic of the token simply allows you to buy and forget, get on with your life and HODL!

Our aim with HODL is to tie the ease of use of buying a token with the upside of yield farming returns.

Having said this, the developer has a vision to expand as the community grows. We believe that our simple mechanism and strong, trusted community of individuals can get us far, but as the community grows even larger, we are planning to strike a partnership with AMM's. This will allow HODL owners to stake their tokens, and earn on top of the 3% fees!

## How long does the redistribution last?

Are you sitting down? Good.

Forever. Depending on the volume and transaction sizes, the amounts you will receive on a daily basis will surely differ - however they will be constant.

The logo features the word "HODL" in a bold, white, sans-serif font. The letter "O" is replaced by a white circle containing a blue diamond icon. The background of the top section is a solid blue color with a pattern of various-sized, translucent blue diamonds scattered across it.

## **What is the circulation of tokens?**

All tokens are in circulation. None are held for the team, or a development fund - 100% of the tokens were available when listed.

## **What is the total supply?**

There are a total of 100 Million HODL tokens. There will never be any more minted or any more in circulation.

## **Was there a pre sale?**

We raised a total of 135 BNB, where 1 BNB = 444.444. The max anyone could contribute was 5 BNB.

## **How can I buy?**

Head over to Pancakeswap.

## **How do I get involved?**
